REDULASE has been created for CELLULITE TREATMENTS, LIQUID RETENTION, TO STIMULATE CIRCULATION AND TREAT THE DEPOSITS UNDER THE SKIN THAT CREATE THE "ORANGE PEEL" EFFECT.

Redulase the latest and innovative formula, consists of the three specific effective ingredients:

- **THEOPHYLLINE** increases the lipolysis, it helps to burn off fat by decreasing the fatty deposits beneath the skin.
- **TROXERUTINE** acts in endothelial inflammatory diseases by blocking the causes that can lead to venous insufficiency. Reduces the capillary filtration responsible of edema.
- **HYALURONIDASE** has the function of dissolving the collagen type IV. It breaks down on the lattice fibrin, which is the basis of extracellular tissue cellulitis, resulting in the decrease of the "orange peel" effect.

The suggested protocol includes:

- 5/8 ml per session, depending on the area to be treated.
- 1 session per week for 10/15 times.
- 1 month maintenance treatment.

Treatment with Redulase can be done either by traditional techniques and with transdermal delivery devices.

The package consists of no. 10 bottles of 20 ml..

Redulase is a formula created by Mattioli Engineering for the treatment of cellulite and water retention.

REDULASE

Redulase is a sterile, non-pyrogenic and isotonic solution, increases lipolysis, lowers unwanted water retention and prevents new cellulite from growing.
